Important information

Performance analysis

Current earnings

Earnings from interest and dividends less any withholding tax paid (credited net earnings), balance of accrued interest on purchases and sales and changes in accrued interest.

Changes in value

Realised and unrealised gains arising from changes in value. Unrealised gains consist of changes in value affecting existing positions at the time of valuation.

Total return

Total return equals the sum of current earnings plus changes in value.

Ending value of assets

The assets shown in the performance overview can differ from the assets shown in the asset overview due to differences in the evaluation method (reference date).

Performance

Performance measures the total income of the portfolio relative to the portfolio value. Inflows and outflows (withdrawals and deposits) are considered using the money and time-weighted calculation method. Performance relates to the reporting period.

Net performance

Performance after deduction of all transaction and administrative costs and net of paid withholding taxes.

Time-weighted

The reporting period is divided into sub-periods. Performance is calculated for each sub-period and then combined for the entire reporting period. This neutralises inflows and outflows (withdrawals and deposits) meaning they do not have any impact on performance.

Money-weighted

Performance is calculated by dividing the sum of current earnings and changes in value by the average invested capital. Inflows and outflows (withdrawals and deposits) impact the amount of invested capital and thus performance.

Asset overview and detailed positions

Liquidity

Account assets and liabilities, accrued interest of short-term investments, foreign exchange transactions, money market investments, money market investment funds and structured products with money market characteristics

Bonds

Bonds and similar investments, accrued interest of bonds and bond-like investments, bond investment funds and structured products with bond characteristics

Equities

Equities and equity-like investments, equity investment funds and structured products with equity characteristics

Alternative investments

Units in hedge funds, private equity investments, real estate investments, commodities, cryptocurrencies and precious metals

Miscellaneous

Units in investment funds (including mixed funds and funds of funds) and others

Important information

Regulatory and legal notice

Vontobel bases the assessment of securities held in custody accounts on representative sources of information commonly used by banks. Derivative financial products issued by Vontobel are assessed using the latest bid price available at the point of valuation from internal Vontobel sources. The valuations serve as a guidance only and are not binding to the bank. The bank accepts no liability for the correctness of the valuation or for other information or calculations in connection with the assets entered into the account.

If no valuation is indicated, this means that no current price could be determined or that the instrument carries no value. The prices displayed do not commit the bank to buy or sell at this price or rate.

We kindly ask you to check this statement of assets and, in the event of discrepancies, to object in writing within four weeks from the mailing date.
